

Introduction of JSEI

Jiangsu Vocational College of Electronics and Information (JSEI), as a provincial government public full-time college, is one of the ten demonstrative higher vocational colleges in Jiangsu province. JSEI is “Personnel cultivation and Training base for nation designated shortage of skills”, “national training base for highly skilled talents in electronics and information industry”, “national cultural quality education base for higher vocational colleges”, “member unit of industrial culture research center of national vocational colleges”, and “1 + X certificate pilot College of the Ministry of education”. JSEI has been awarded the "national advanced collective of information industry system". JSEI has an HSK test center set up by the China National Leading Group Office for the international promotion of Chinese and Confucius Institute Headquarters.

JSEI was founded in 1978 and is located in Huai’an of Jiangsu province, a famous historical and cultural city. It sits on higher education park, Huai’an city, covering a total area of 1080 mu, with a construction area of 310,000 square meters. The picturesque campus, with beautiful landscapes and convenient transportation and living facilities, is an ideal place to study and research. JSEI is one of the top 50 institutions of Higher Vocational Education in service contribution, teaching resources and educational effectiveness in China, one of the top 100 institutions of Higher Vocational Education in student development index, ranking 29th in the national university discipline competition. JSEI has won the first comprehensive assessment of local colleges and universities in Jiangsu province for two consecutive years.

There are over 14,000 students on campus, among whom over 120 are

international students from Asia, Africa and Europe. At present, there are 11 schools (departments) which have 47 specialties and one undergraduate program, that is, School of Electronic Network, School of Digital Equipment, School of Computer and Communication, School of Intelligent Manufacturing, Business School, School of Intelligent Transportation, School of Architectural Decoration and Art Design, School of International Education, and School Innovation and Entrepreneurship, cultivating more than 60,000 high-quality technical personnel for the development of the industry, regional economy and society.

JSEI has been forcing ahead on the education internalization and expanding the channels for international communication and cooperation. JSEI has built the cooperation with more than 30 overseas institutions such as Singapore, England, German, USA, Australia, The South Korea, France, Sweden, Italy, and other countries and regions, to carry out college-level diploma education, cooperative cultivation projects and mutual recognition of students' credit. In recent years, more than 338 backbone teachers went abroad to study, provided overseas training for more than 300 foreigners, and invited 150 foreign experts and scholars to visit our college and carry out lectures. More than 200 students have been sent abroad to study as exchange students.
