

A Letter to International Students in JSEI

Date: March 27, 2022

From: School of International Education

To: All International Students in JSEI

Dear international students,

In view of the current situation of Coronavirus Pneumonia, China is now actively taking effective measures to fight against the epidemic and carry out comprehensive prevention and control. Our college is deeply concerned about health and safety of each international student. Instant arrangements are made for the epidemic prevention and control in a scientific, orderly and strict manner.

At present, the epidemic prevention and control is in the critical period, which needs the active cooperation of every international student to overcome the difficulty together, and shouldering the common responsibility of fighting against the epidemic and building a community with a shared future. Here, we would like to make the following suggestions.

Do well in safety protection and wear a mask when you go out. Learn correct and effective prevention and control knowledge and enhance hygiene and health awareness. No visiting, no gathering and no going out whenever possible. Minimize unnecessary outdoor activities and avoid crowded public areas. Eschew visits, group meals and mass gatherings.

Comply with the college arrangements, all international students outside school should not return to the college in advance. The exact time

to return to college is to be announced to you in advance when it is determined. The campus of the college is under closed management, and international students on campus are not allowed to leave. To guarantee students' health and safety, all outsiders are forbidden to enter the international students' dormitory building.

Please keep in touch with us. If you are in trouble, please contact us as soon as possible, and we will try our best to help you. During the epidemic prevention and control period, the college will collect information regarding students' physical condition. Please cooperate and report the information requested in a timely manner. If students around you have above symptoms, please help to report and take certain isolation methods.

In order to ensure the teaching progress and quality during the period of epidemic prevention and control, the college is already using online teaching. You can take part in online learning, and practice tasks through the online teaching platform, and lay a solid foundation for later learning.

Dear all international students, the more critical period we are in, the more we need each student's understanding and cooperation! Please believe that our College always care about the health and safety of all students. We firmly believe that as long as we work together and take proper precautions, we will be able to win the battle against the epidemic!

Finally, we sincerely wish each international student more progress in study, good health and safety!
